

Solar PV Technical Assistance for IGEN Community Colleges

Through a partnership, Illinois Green Economy Network (IGEN) and the Midwest Renewable Energy Association (MREA) are offering your college's solar planning team access to no-cost technical assistance through April 30, 2019.

If your college is read to act on its solar PV development goals, now is the time!

The following Solar PV Technical Assistance Services are available:

- **Project Plan Development Report** – get assistance affirming your college's goals, objectives and priorities for on-campus solar PV development.
- **Site Assessment & Report** – have the MREA complete a site assessment to quantify the solar potential on your campus.
- **Economic Feasibility Analysis** – MREA will align your utility rate and consumption data, site assessment information, and goals to complete economic feasibility analysis before soliciting proposals.
- **RFP Development Assistance** – let MREA assist your team develop a solar PV RFP and solicit qualified solar PV developers for your project.
- **RFP Evaluation Assistance** – MREA will assist your team evaluate solar PV developer proposals to be sure your team gets the best solar outcomes.
- **System Inspection & Report** – MREA will provide your team third-party validation mid-construction and before final project sign-off to be sure the system is performing as proposed.
